Bar 717 Ranch Camp Staff COVID-19 Vaccination Policy

We believe that COVID-19 vaccines will benefit the overall health of our community at large and that vaccines will play an essential role in ensuring a safe camp season.

We are requiring all of our residential staff to be fully vaccinated against COVID-19 prior to coming to work at camp this summer. COVID-19 vaccines have been shown to be safe and effective, regardless of gender, race and ethnicity. Vaccines have also been shown to be safe and effective in people who had infection with COVID-19 and is recommended even for those individuals who have antibodies. You can read more about the vaccines and their safety via the [CDC website](#).

A person is fully vaccinated once they have received their primary series of COVID-19 vaccines—two doses of Moderna or Pfizer, or one dose of Johnson and Johnson, after a period of two weeks has passed since the final dose. **We are also strongly recommending that all residential staff update their COVID-19 vaccination status via booster when eligible.**

We strongly recommend that all non-resident staff be fully vaccinated against COVID-19 and update vaccination status via booster when eligible. Any staff member that is not fully vaccinated against COVID-19 may be required to submit to daily testing or wear a mask in indoor spaces at all times.

This plan will be updated regularly according to changes published by the ACA and CDC.
